

COMMISSION ON MUNICIPAL SANITATION

DIVISION OF SANITATION

NEWARK, NEW JERSEY

Special Sanitation Bulletin For Your Health

PROTECT YOURSELF . . . YOUR FAMILY . . . YOUR CITY

How to Help Prevent Polio and other Crippling Diseases through Cleanliness

1. Keep the streets and yards free of litter.
2. Get rid of refuse cans that are damaged beyond repair.
3. Use metal receptacles with tightly fitted covers for all refuse. These containers shall have a pull handle or handles and should not be more than 30 gallon capacity, 18 inches in diameter, and 26 inches in height.
4. Don't overload the receptacle. Keep refuse three inches below the top.
5. Drain garbage of all water, and wrap securely, using heavy paper before placing in metal container. Keep cans free of water.
6. Keep containers clean. Wash cans occasionally with an antiseptic solution.
7. Have containers readily accessible on the property for collector. Keep dogs tied for safety of collector.
8. Crush cartons and securely wrap all materials, such as paper, rags, and magazines.
9. Place grass clippings, leaves, etc., in a secure container.
10. Cut tree and shrub limbs in lengths of about three feet and tie in bundle not greater than 18 inches in diameter.
11. Use the receptacles placed conveniently along the curb for litter, such as paper, tissues, wrappings, fruit skins, etc.
12. Sweep sidewalks regularly, placing the sweepings in the proper container.

OUR SERVICE TO YOU Streets and Sidewalks will be cleaner.
